

FRISBEE Newsletter #14

- News about Oil and Gas Data from Denmark

New! Download. All Well Data Summary Sheets, released appraisal and exploration wells

It is now possible to download all information included in the Well Data Summary Sheet (WDSS) on GEUS' web site at the same time as Excel spreadsheets. The WDSS contains technical and administrative information about all released appraisal and exploration wells in the Danish sector. Furthermore, lists of all available data types and sample material are included.

Newly released well data packages (offshore, Danish North Sea)

Well data packages from the offshore exploration well Hibonite-1 and the offshore appraisal well Solsort-2 have been released. The wells were drilled in 2012 and 2013 in the Danish North Sea. Please see map for location: [Newsletter-14map_2019_12.pdf](#)

- [HIBONITE-1](#) (Available from 28-08-2019. Price using Frisbee – 43,875 DKK)
For details (Well Data Summary Sheet): [HIBONITE-1](#)

About: Hibonite-1 [Source: DEA Press release / 25-03-2013]:

As operator of licence 5/06 Wintershall Noordzee B.V. has drilled the Hibonite-1 (5504/1-3) exploration well in the western part of the Danish North Sea. Oil was discovered in sandstones of Late Jurassic age.

Hibonite-1 was drilled as a deviated well and reached its total depth in claystone of Jurassic age at 4431 metres vertically below mean sea level. Cores were taken and a logging programme was carried out. During a production test oil and gas was produced.

For a further evaluation of the extent of the oil discovery two sidetrack were drilled, Hibonite-1A and Hibonite-1B. Both sidetracks confirmed the presence of oil bearing sandstone of Late Jurassic age.

Hibonite-1 was spudded on 10 September 2013 with the jack-up rig Noble George Sauvageau at the position 55° 55'28.17" N; 04° 10' 25.66" E (UTM zone 31; 6 198 435 m N; 573 351 m E), where the water depth is 52 metres.

The well is plugged and abandoned. Link to source: [DEA press release](#)

- [SOLSORT-2](#) (Available from 23-09-2019. Price using Frisbee – 75,525 DKK)
For details (Well Data Summary Sheet): [SOLSORT-2](#)

About: SOLSORT-2 [Source: DEA Press release / 18-12-2013]:

As operator for companies in licence 3/09 DONG E&P A/S has drilled the Solsort-2 (5604/26-6) appraisal well in the westernmost part of the Danish part of North Sea. Oil and associated gas was produced in a test.

Solsort-2 was drilled as a slanted well and reached its total depth in chalk at 3167 metres vertical below mean sea level. The well encountered in Palaeocene sandstones containing oil and gas. In order to appraise the extent and quality of the oil discovery two sidetracks were drilled. The sidetracks did not encounter hydrocarbons. A comprehensive data collection programme was carried out and coring was performed in two of the wellbores.

Solsort-2 located app. 2.5 km southwest of the Solsort-1 well, which in 2010 discovered oil. Solsort-2 like Solsort-1, was drilled in cooperation between the licensees in the two licences 4/98 and 3/09. Furthermore, licence 7/89 has contributed financially to the drilling of Solsort-2 in order to gain access to data from the well.

The well Solsort-2 was spudded 21 August 2013 with the jack-up rig Mærsk Resolve at the position 56° 08'15.571" N; 04° 16' 09.406" E (UTM zone 31; 6 222 264 0 m N; 578 882.0 m E), where the water depth is 61 metres.

The well is plugged and abandoned. Link to source: [DEA press release](#)

Released reports added to Frisbee

A report received after the release of the main part of data from a well will be released and added to Frisbee web shop immediately after release. In case you have already purchased the 'well data package' earlier – Please contact GEUS to receive a discount code prior to purchase of the newly released report(s).

The following reports have been added to Frisbee (since Newsletter #12, January 2019):

Well	Title	GEUS File	Company
./.	./.	./.	./.

Free download - Frisbee web shop

- Standardised formation tops for all Danish exploration wells are available for free download via '[Data Collections](#)' tab in the Frisbee Webshop.
- Well completion reports
- Well deviation data
- 3D surveys acquisition reports

All prices are valid if data is being purchased using GEUS' web shop Frisbee.

All prices are excl. VAT and are calculated for one company. Group discounts are available.

For further information about GEUS' products and terms of delivery – Please see:
